

Lattice Environmental Policy

August 2010

“Lattice Semiconductor is committed to conducting business in a matter consistent with the efficient use of resources and materials, and the preservation of the natural environment.”

- Lattice Semiconductor is committed to continually reducing our impact on the natural environment through training and communication of company policy to our employees.
- Lattice Semiconductor meets all applicable environmental laws and regulations as well as meeting our own standards and objectives for continuous improvement.
- Lattice Semiconductor has been recognized by the US Environmental Protection Agency and the State of Oregon for our low material consumption.
- Lattice Semiconductor is leader in the development of Lead Free and Halogen Free (both are RoHS Compliant) packaging solutions for our product families.

- **All Lattice Semiconductor subcontract manufactures are ISO14001 registered, and suppliers are routinely reviewed to ensure continued compliance.**
- **Lattice Semiconductor works closely with our customers and suppliers to identify and rapidly eliminate banned substances from our products.**
- **Successive generations of Lattice Semiconductor products achieve reductions in power consumption and raw materials.**
- **Lattice Semiconductor facilities maintain aggressive recycling programs – paper, packaging, products, and chemicals.**
